Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner indicated that claim 38 did not distinguish over North '847 since the body (35) can be considered the free end and the eyelet for the line can be considered the line connection end wherein the hollow body (10) has a first end molded into the free end (35). Claim 38 does not particularly recite the position/orientation of the second end. Examiner suggested amending claim 38 to recite the hollow member second end which extends from the free end. Applicant agreed to incorporate the limitation of claim 42 into claim 38 and cancel claim 43 since it is the same as claim 41. Please see Examiner's Amendment for details.
